Disruption is Upon Us: Integrated Planning is Your Superpower

Nicholas R. Santilli, Ph.D.
Senior Director for Learning Strategy
SCUP Planning Institute

Professor Emeritus
John Carroll University
Learning Outcomes

Join a movement to mature integrated planning as an indispensable norm.

Spark conversations and breed familiarity with the practices and outcomes of integrated planning.

Apply a value proposition for integrated planning to one’s institution.

Clearly communicate the need for the evolution of integrated planning.
Today’s Activities

• **Opening:** There are enormous challenges, some say disruption, in higher education and there is value for integrating planning. But the **understanding and sustainable practice** of integrated planning is elusive. How can integrated planning drive student success and institutional thriving?

• **Framing:** What are examples of these **challenges and barriers to change**? How might integrated planning be used to address the most serious challenges faced by our sector?

• **Anchoring:** Discuss how we can **evolve the concept of integrated planning** so it becomes something **managed creatively over time** and supports **student success, collaborative governance, institutional effectiveness and accreditation**.

• **Plotting:** Discuss how we can **move integrated planning** from a process to a **cultural norm**.

• **Exploring:** Engage in a **series of exercises** to help demonstrate key aspects of integrated planning.
Integrated Planning Supports Student Success and Institutional Thriving
Planning in a Time of Disruption

What Does Disruption Look Like in Higher Education?
On Disruption: Clayton Christensen
How to Manage the Disruption of Higher Education

On the next two slides are four observations regarding the context of higher education in the US.

Let’s take a few moments to review and discuss his observations.

Summary is based on the author’s presentation at the Forum for the Future of Higher Education’s 2009 Aspen Symposium
1. American higher education—albeit the envy of the world—is mired in an expensive and outdated delivery model, one that prevents huge swaths of our population from taking advantage of the knowledge and expertise harbored by our nation’s colleges and universities.

2. Simply put, higher education’s prevailing business model is a mismatch with the current educational needs of our population. It is time to rethink and disrupt that model.
3. **Disruptive innovations** reduce costs dramatically by *providing simpler, less expensive products that are good enough* for the job at hand. The overwhelming concern for costs that prevails during recessions spurs and accelerates disruptive innovation.

4. **Despite the explosive growth of online learning**, higher education has trapped many disruption-enabling technologies in complex, high-cost institutions that conflate two and sometimes all three business models under one roof. **Business model innovation** will help free disruptive technologies and make higher education more affordable, accessible and effective.
Disruption.... or Not?

- Has Christensen accurately captured disruption in higher education?
- What are the forces impacting higher education in your region and beyond?
- How will your institution respond?
- In your opinion, what are two or three of the most compelling problems facing higher education in your region?
Responding to Disruption

The Case for Integrated Planning

Managing Higher Ed Disruption Through Planning
The Case for Integrated Planning

• In our opinion, the launching point for creating long-term capability to manage change starts with building **durable cross-functional relationships** across the units of an institution.

• These strong on-campus partnerships **create a culture** that embraces the integrated planning requirements for sustaining the execution of the integrated plan, namely from strategic vision to operational tactics for organizational viability.

• Administration, faculty, students, employers and even the institution’s local community all have a stake in the success of a campus and must be included in the planning processes that ultimately **creates a durable culture to manage change**.
The Case for Integrated Planning

• The ability to address the non-stop emergence of new trends on a campus through a responsive planning process is critical for all institutions, regardless of size or current financial standing.

• In the absence of good planning, even the largest of endowments can suffer quickly if the campus culture is reactive to change.

• Build strong relationships anchored against the desire to support the greater good of an institution, and one will be ready for whatever trends come his or her way.
What Forces *Shape* the Context of Higher Education?
Global Disruption
Mergers + Closures
New Competitors
Demographics
Costs
Compliance

Resource Constraints
Consumer Demands
Political Pressures
Forces of Change

What Forces Inhibit Change in Higher Education?
Barriers to Change in Higher Education

- Decreasing Investments
- Compliance
- Institutional Culture
- Complex Organizational Models
- Slow to Adapt to the Changing Environment
- Challenge to Stay Relevant
- Limited Revenue Streams
- Static Business Models
- Lack of Urgency
- Risk Aversion
- Cost--Consumer and Provider
Forces of Change

Why Integrated Planning?
Integrated Planning

- Develop a Capacity for Change
- Evolve a Culture of Planning
- Engage the External Environment
- Heuristic to Remain Relevant
- Alignment
- Discipline
- Value Proposition
- Navigate Complexity
- Sustainable Future
- Link Strategy to Action
- Deepen Relationships
- Engage the External Environment
- Value Proposition
- Navigate Complexity
- Sustainable Future
- Link Strategy to Action
- Deepen Relationships
Responding to Disruption

The Purpose of Integrated Planning
Why Integrated Planning?

- Customary Organizational Practice in Higher Education
- Driven by Mission
- Informed by Data
What Is Integrated Planning?

Integrated planning is a **sustainable** approach to planning that builds **relationships**, **aligns** the organization, and emphasizes preparedness for **change**.

**Integrated planning** engages all sectors of the academy—academic affairs, student affairs, business and finance, campus planning, human resources, information technology, communications, and advancement. It involves all stakeholders—faculty, students, staff, alumni, and external partners.

Society for College and University Planning
Integrated Planning
Strategic Planning, Operational Planning

• **Integrated Planning:** “A sustainable approach to planning that builds relationships, aligns the organization, and emphasizes preparedness for change.

• **Strategic Planning:** “A deliberate, disciplined effort to produce fundamental decisions and actions that shape and guide what an institution is, what it does, and why it does it. Strategic planning is an approach to dealing with the serious challenges that an institution, its stakeholders, partners, and communities face.”

• **Operational Planning:** “An instrument for implementing a strategic plan on a unit level. Operational planning is often contingent on, and driven by, annual budget cycles.”

• Society for College and University Planning
What is Distinctive about Integrated Planning?

Institutions have problems that integrated planning can solve.

- **Collaborative:** Engages all stakeholders
- **Aligned:** Across the institution
- **Sustainable:** Build a culture of planning
- **Change-ready:** Poised to respond to a volatile environment
For Discussion

- Integrated planning is highly variable depending on local conditions. Given that there’s is no one-size fits all framework for diverse institutional types:
  - How does integrated planning work, or not work, in your estimation?
  - What actions might be common, essential, and/or transferable?

- How do we shift emphasis from ‘building plans’ to the ‘building an integrated planning culture’?
  - What would be required and who would need to be involved?
Impact of Integrated Planning

- Accreditation
- Collaborative Governance
- Alignment
- Sustainable
- Change-ready
Accreditation
Accreditation

• All of the regional institutional accreditors identify *integrated planning, by name*, as a customary institutional practice and an expectation for accreditation.

• Specialty accreditors either directly or indirectly reference *integrated planning* as a customary institutional practice necessary for accreditation.
Collaborative Governance
Collaborative Governance
A Necessary Prerequisite for Integrated Planning

- Fundamentally a human activity
- Supports cross-functional relationships
- Institutional culture matters
- Leverage existing governance structures
- Fosters a culture of shared purpose
Alignment
Overarching Strategic Plan

Institutional Plans

Division Plans

College Plans

Departmental Plans

The strategic plan for the entire institution

Academic plan, campus master plan, budget planning, IT plan, etc.

Divisions within an institution—Finance, Student Affairs, etc.

Plans for colleges within a university

Departments, academic areas, administrative units
Aligning the Institution
Up, Down, and Sideways

• Alignment Assessment---A snapshot across the institution

• Academic Planning Alignment---How does the academic plan set a vision for institutional progress?

Report: Successful Planning

Report on Features of Successful Planning
Features of Successful Integrated Planning Efforts

• Visible leadership at the presidential and executive levels;
• Linked to budgets with budget flexibility for change;
• Local champions, but broadly based involvement;
• Ongoing evaluation/changes to the plan;
• Empowerment of stakeholders;
• Reaches across silos; strategic and institutional;
• Communication -- creates the conditions for success (talked about); regular reporting on progress; strategic and linked to ‘brand’, and;
• Adapted to the university, not imported.
Things you can do.

● Balance creativity and discipline via distributed leadership
● Connect choices to underlying values
● Develop planning competence across the institution
● Identify and celebrate the expert-generalist
● Bridge pragmatism and ambition for sound implementation
A Final Thought
Remember our Purpose

• Act with compassion
• Lead with integrity
• Live for justice
